Allowable Subject Matter

1. Claims 1-5, 8-16, 19-20 allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, 19, the applicants have presented a persuasive argument, see page 4 of the Appeal Brief filed on 10/6/2006, that given the highly variable nature of the results as disclosed by Shul and the fact that the gas mixtures are different in the two systems, one would not have a reasonable expectation of success in importing the gas flow rate of BCl₃ taught in Shul into the system of Tanabe to produce the claimed inventions. Therefore, the final rejection(s) of claims 1-5, 10, 19 under 35 U.S.C 103(a) as being unpatentable over Tanabe in view of Shul have been withdrawn

Regarding claim 20, the applicants have presented a persuasive argument, see page 5 of the Appeal Brief filed on 10/6/2006, that since Shul teaches using the ratio of CH₄/H₂ is about 2/20 in the only example provided, Shul teaches away from the claimed limitation. Therefore, the final rejection of claim 20 under 35 U.S.C 103(a) as being unpatentable over Shul in view of Demmin have been withdrawn

The reasons for allowance of claims 8, 11 have been stated in the previous final office action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
